

SWISSVAX APPLICATION TIPS

IN ORDER TO HELP YOU GAIN THE MOST OUT OF THE SWISSVAX PRODUCTS YOU 'VE JUST PURCHASED - GP CARS HAVE DEVISED A SIMPLE GUIDE ON HOW TO BEST USE THESE PRODUCTS.

THESE ARE :-

- ALWAYS CARRY OUT A WAX TREATMENT IN THE SHADE AND WHEN THE CARS PANELS ARE COOL. APPLYING WAX TO COOL PAINTWORK IS MUCH EASIER TO SPREAD EVENLY AND REMOVE.
- WHEN WASHING CAR BEFORE WAX TREATMENT - TRY TO AVOID USING SPONGES. NO MATTER HOW CAREFULLY YOU WASH OUT YOUR SPONGE, A FEW DIRT PARTICLES ALWAYS REMAIN TRAPPED IN THE PORES AND CAN CAUSE FINE SCRATCHES. DRY THE VEHICLE WITH A LARGE BATH TOWEL MADE OF PURE COTTON.
- CLEANSING THE PAINTWORK IS IMPORTANT BEFORE APPLYING WAX FOR THE FIRST TIME AS THIS THOROUGHLY CLEANS THE PORES OF THE PAINT AND CREATES A CLEAN SURFACE FOR THE WAX TO ADHERE TO. WHEN CLEANSING THE CAR, IT'S BEST TO APPLY CLEANER FLUID OVER AN AREA OF ABOUT 1METRE SQUARED WITH LIGHT PRESSURE. WITH A COTTON TOWEL, REMOVE FLUID BEFORE IT DRIES (MOST PAINT SURFACES WILL SQUEAK). BE CAREFUL NOT TO WIPE CLEANER FLUID ON ANY PLASTIC SURFACES AS THIS CAN BE VERY HARD TO REMOVE. CLEANSING THE VEHICLE IS ONLY REQUIRED ABOUT EVERY YEAR - YOU DON'T NEED TO DO IT EVERY TIME YOU APPLY WAX TO THE VEHICLE. REMEMBER - EVERY TIME YOU APPLY CLEANER FLUID YOU ARE REMOVING THE WAX.
- APPLY WAX SPARINGLY WITH AN APPLICATOR IN AN EVEN BACK AND FORTH MOTION - NOT CIRCLES! THE LONGER YOU LET THE WAX STAND ON THE CAR, THE BETTER THE RESULTS. THE EXTRA TIME ALLOWS THE WAX MOLECULES TO SOAK INTO THE PORES OF THE PAINT. WE LET THE WAX STAND ON THE CAR FOR A MINIMUM OF 3 HOURS - IF POSSIBLE, OVERNIGHT. THE WAX IS JUST AS EASY TO REMOVE WHEN LEFT ON FOR THIS PERIOD OF TIME AND THE RESULTS ARE MUCH BETTER.
- WAX CAN ALSO BE APPLIED TO ALLOY WHEELS AFTER THEY HAVE BEEN THOROUGHLY CLEANED. APPLYING WAX TO WHEELS MAKES IT MUCH EASIER TO REMOVE BRAKE DUST IN THE FUTURE.
- AFTER REMOVING WAX WITH A TERRY TOWEL, TRY TO PARK THE CAR IN THE SUN FOR A FEW HOURS. THE HEAT FROM THE SUN WILL HELP TO DISPERSE THE WAX MOLECULES EVENLY. YOU WILL NOTICE THE LUSTRE CONTINUE TO DEEPEN DURING THIS PERIOD.

- IF YOU WISH, YOU CAN CONTINUE TO APPLY EXTRA COATS OF WAX OVER THE FOLLOWING WEEKS (WITHOUT CLEANSING VEHICLE). THIS IS NOT NECESSARY, BUT IT WILL GIVE THE CAR THAT DEEP, WET LOOK.
- ALSO – WHEN WASHING VEHICLE, IT'S A GREAT IDEA TO USE WARM WATER. THE WARM WATER HELPS TO HEAT AND DISPERSE THE WAX EVENLY OVER THE VEHICLE. DON'T USE CHEMICAL BASED CAR SOLVENTS TO CLEAN VEHICLE. THESE STRIP THE WAX RIGHT OFF THE CAR. USE A CAR BATH THAT STATES IT IS SAFE FOR WAXES. SWISSOL MAKES A PH NEUTRAL CAR BATH THAT IS SAFE FOR WAX TREATED CARS.
- WHEN NOT IN USE – STORE THE WAX IN THE FRIDGE TO KEEP FRESH.
- DON'T GET YOUR CAR WASHED WHILE IT IS IN FOR A SERVICE – MOST SERVICE CENTRES USE HARSH DETERGENTS THAT REMOVE THE WAX.
